EDUCATION

 $\textbf{Master's Degree in Statistics and Data Science} \ , \ \textit{Universit\`a degli studi Milano-Bicocca} \qquad \text{October 2023-Present} \ | \ \text{Milan, Italy Milano-Bicocca} \ | \ \text{October 2023-Present} \ | \ \text{Milan, Italy Milano-Bicocca} \ | \ \text{October 2023-Present} \ | \ \text{Milan, Italy Milano-Bicocca} \ | \ \text{October 2023-Present} \ | \ \text{Milan, Italy Milano-Bicocca} \ | \ \text{October 2023-Present} \ | \ \text{Milano-Bicocca} \ | \ \text{Milano-Bicocca} \ | \ \text{October 2023-Present} \ | \ \text{Milano-Bicocca} \ | \ \text{October 2023-Present} \ | \ \text{Milano-Bicocca} \ | \ \text{Milano-Bicocca} \ | \ \text{October 2023-Present} \ | \ \text{Milano-Bicocca} \ | \ \text{Milano-Bicocca} \ | \ \text{October 2023-Present} \ | \ \text{Milano-Bicocca} \ | \ \text{October 2023-Present} \ | \ \text{Milano-Bicocca} \ | \ \text{October 2023-Present} \ | \ \text{October 2023-Present} \ | \ \text{Milano-Bicocca} \ | \ \text{October 2023-Present} \ | \ \text{Milano-Bicocca} \ | \ \text{October 2023-Present} \ | \ \text{October 2023-Present} \ | \ \text{Milano-Bicocca} \ | \ \text{October 2023-Present} \ | \ \text{October 2023-Present} \ | \ \text{Milano-Bicocca} \ | \ \text{October 2023-Present} \ | \ \text{Milano-Bicocca} \ | \ \text{October 2023-Present} \ | \ \text{Milano-Bicocca} \ | \ \text{October 2023-Present} \ | \ \text{Milano-Bicocca} \ | \ \text{October 2023-Present} \ | \ \text{Milano-Bicocca} \ | \ \text{October 2023-Present} \ | \ \text{Milano-Bicocca} \ | \ \text{October 2023-Present} \ | \ \text{Milano-Bicocca} \ | \ \text{October 2023-Present} \ | \ \text{Milano-Bicocca} \ | \ \text{October 2023-Present} \$

· Relevant Courses: Stochastic Processes, Machine Learning, Statistical Learning, Bayesian Statistical Models, Advanced Statistics, Data Mining, Microeconometrics, Economics for Data Science, Computational Statistics, Spatial Statistics.

Bachelor's Degree in Statistical Sciences, Università degli studi di Padova

Padova, Italy

- Relevant Courses: Statistics, Statistical Inference Theory, Probability, Database, Processing Systems, Analysis of Time Series, Multidimensional Data Analysis.
- **Dissertation**: "Time Series Analysis of milk sales, in collaboration with Ali Spa"- I worked with a supermarket company to analyze multivariate time series of milk sales. Supervisor: Prof. L. Bisaglia,

WORK EXPERIENCE

Cashier and shop assistant, Alì Spa

06/2019 - 06/2023 | Padova, Italy

· Cashier responsible at an Alì outlet. I worked full time for Alì Spa as a cash manager, shopping assistant and logistics management. During my four years of work I developed logistics management skills and ability to work in a team. I learned how to use the cash registers, manage the company's internal software, and do counting and closing the cash register. I did the work activity during my bachelor degree's programs. I have also collaborated with Alì Spa to do an analysis of multivariate time series for my dissertation. It was for me an opportunity to understand how a company actually manages data and what goals it sets are achieved through the use of statistical models.

PROJECTS

Lab Data Challenge - STMicroeletronics Collaboration, Python, R

- Year: 2024 (May-June)
- · Participated in an intensive data analysis laboratory challenge in collaboration with **STMicroeletronics** (leading global semiconductor company) focused on solving a real-world industrial problem. The goal was to analyze a complex dataset to build a classification algorithm that was of interest of the company. Gained practical experience in industry-driven data science applications, enhancing skills in data handling, analysis, and teamwork. The results were presented to Technical director Danilo Pietro Pau (Pau's post of the challenge). **in**

Other Projects, R Studio

· Here are some of the projects I worked on in college. When I was in Padova, during my Bachelor's degree, I did an analysis of Vinho Verde consumers' perceived quality through principal component analysis and factor analysis. •

When I was in Milano, during my Master's degree I worked extensively on various machine learning algorithms. In the first project, I analyzed students' stress levels in collaboration with other classmates, addressing a classification problem using Support Vector Machines, Neural Networks, and Decision Tree algorithms. \bigcirc

In a different project I tried to forecast the financial worth of football players using different Statistical Learning algorithms. \Box In my final year, I completed a capstone project for the Bayesian Statistical Models exam, where I compared various models for predicting stock options. The project involved implementing dynamic regression models using the bsts package in RStudio, with a focus on model performance and predictive accuracy. \Box

For the Data Mining course, I developed a predictive model in R to estimate real estate prices in Milan. The project involved data preprocessing, feature engineering, and model selection using Linear Regression, LASSO, and Random Forest. Model performance was assessed through cross-validation and evaluated using MAE. \P

IT SKILLS

- · Data Analysis: Python, R, Java, SQL, STATA, SPSS
- · Certifications: Lean White Belt Six Sigma, SAS Certified Specialist: Base Programming Using SAS 9.4 Ssas

PERSONAL INTEREST

- · Sports: I have played soccer for over ten years, an experience that has helped me develop strong teamwork, discipline, and goal-oriented determination. Competing in diverse settings also gave me the opportunity to connect with people from various backgrounds.
- Music: I began studying guitar during middle school as part of a specialized music program. Playing the guitar allows me to express emotions and ideas through sound, and I continually enjoy exploring diverse rhythms and musical styles.

LANGUAGES

- · Italian: Native
